Gary / Chicago International Airport Unveils New Website

Region's Premier Mid-Sized Airport Showcases Modern, Easy-to-Navigate User Experience

(Gary, IN – January 8th, 2024) – The [Gary / Chicago International Airport \(GCIAG\)](#) formally announced the launch of their new, easy-to-navigate airport website this morning to coincide with the first full workweek of 2024. The website address of www.flyggy.com remains unchanged from the prior iteration, however, the new site includes a more streamlined interface and allows easier access for veteran aviation users and new visitors alike to navigate the site.

This represents the first redesign of the airport's website since 2018, and since that time the airport has undergone significant enhancements. The prior website, while still functional, was becoming increasingly obsolete and in need of a redesign to allow a seamless interface for visitors to access important airport information.

Among the enhancements at the airport since the unveiling of the previous website are the on-site, permanent state-of-the-art Customs facility that provides GCIAG with a significant competitive advantage, given the airport's proximity to Chicago's Central Business District, or Loop. The convenient location of the airport, located just 25 miles and typically around a 30-minute drive to downtown Chicago, has been a key driver in attracting international air travelers, as they are able to fly into the airport from any global destination without needing to stop elsewhere to clear customs.

2020 saw GCIAG began cargo service operations via UPS, and cargo operations have quickly scaled, now ranking 3rd overall in the State of Indiana in terms of its freight volume, with further growth anticipated in future years.

In 2022, GCIAG received formal FAA approvals for its Master Plan, a planning document that will guide the next several decades of airport development and growth. In late 2023, the airport announced the acquisition of the Griffith – Merrillville Airport, making GCIAG one of only three (3) aviation systems in the State of Indiana.
